Congratulations on investing in yourself, your business, your legacy and your future.

The unique part of this program, is what I am teaching you, I have done and I'm excited to be passing on this technology with you.

The program is **12 weeks in a group setting**, where (describe your format) ie. one week we will do a lesson, and the next week will be Q&A and to review.

And in between that time, you will be posting in our private forum questions, material for review, everything to keep you moving forward rapidly with the elements.

As an early adopter you were given a significant savings, and in exchange I will ask for your patience as I gather the remaining members we need to start. As soon as I have them you will know of the launch date and all the details. In the meantime be sure to watch the posts that will keep you connected to our private Facebook group.

The **first date for our class will be announced via email and the forum.**

Soon I will be doing some polls and surveys in the Facebook group - and I look forward to being able to help you (benefit of your program)

And if you can't make a class, no worries, everything will be recorded and you can pre-submit questions and they will get answered even if you aren't there.

THIS IS YOUR TIME - TAKE IT !!!
